

# VStar Begins

# VStar is...

- intended to be an easy-to-use variable star data visualization and analysis tool;
- a SourceForge project;
- still in progress;
- being implemented in multiple phases;
- in need of more testers (the more the merrier, especially with respect to platforms);
- no formal releases yet, but downloadable (please do; see Links slide).

# Key Features

- Now

- Takes input from files and AAVSO database
- Light curve with optional error bars
- Mean plot plus light curve with optional error bars
- Data related to each of these plots in tables
- Series visibility change, with effect upon mean plot
- Inspection of individual observations
- Saving & printing

- Next

- Phase plots
- Period analysis algorithm implementation
- Bug fixes based upon feedback so far

# Who?

- David Benn
  - Development
- Michael Umbricht
  - Testing, encouragement, ideas
- AAVSO Staff
  - Sara Beck, Arne Henden, Elizabeth Waagen, Aaron Price, Rebecca Turner, Matt Templeton
    - Oversight, liaison, analysis, testing, encouragement
- You?
